Subtitles supply

Subtitles

- Format: *.stl EBU binary

- alternative format: *.stp (Belle-Nuit)

- maximum length of line approx. 56 characters (for DCP and TV-High definition)

- Please consider that the time code relates to the 1st frame of action (ffoa) and not to the QuickTime which has been used for spotting

- Bilingual subtitles must be supplied as one file

- In case of changes or corrections we need a new entire file of subtitles

- Changes of position of single subtitles must be included in the file. Please send as a note with containing all re-positions.

- For fonts like Arabic, Chinese, Cyrillic and others please contact us.

- Please consider that the frame rate corresponds to the deliverables ordered.

We also take care of the whole subtitling process, from translation to spotting and integration. Please contact us.
